- Programming**
 - C, C++, Python
- Tools**
 - Git, Linux

LANGUAGES

- English
- French
- Turkish
- Arabic

INTERESTS

- Cooking
- Sports

PROFILE

Software development student focused on web and mobile applications. Comfortable with both frontend and backend work, having built several projects from scratch using React, JavaScript, and PHP. I learn quickly, like solving real problems, and I am looking for an internship in Morocco where I can contribute to a real team.

PROJECTS

TangierCart — Smart Digital Card System tangiercart.vercel.app

- Built a mobile and web app to manage digital cards for users.
- Added secure login with OTP verification and PIN code.
- Created an admin dashboard to manage users and accounts.
- Integrated a QR code system for scanning and quick access.

Tech: React Native, PHP, MySQL, JavaScript

GYMCOO — Fitness Platform gymcoo.vercel.app

- Developed a responsive web application for a fitness service.
- Set up a full user management system (sign up, login, profile).
- Connected the frontend to a PHP and MySQL backend for dynamic data.

Tech: HTML, CSS, JavaScript, PHP, MySQL

StudySphere — Study Platform

- Worked in a team to build a collaborative platform for students.
- Designed features for study groups, sharing resources, and events.
- Used Git for version control and team collaboration.

Tech: HTML, CSS, JavaScript

Additional Frontend Projects

- studify-azure.vercel.app skill-crafter-omega.vercel.app
- teletravail-final.vercel.app tangier-furnish-v1.vercel.app

EXPERIENCE

Personal & Academic Projects 2023 – Present

Self-directed — Tangier, Morocco

- Built and deployed more than 5 web projects, working on both frontend and full stack.
- Designed clean, responsive interfaces that work well on desktop and mobile.
- Used JavaScript to add dynamic features such as form validation and DOM interaction.
